

Why Intuitive Surgical?

In January 1999, Intuitive launched the *da Vinci* System, and in 2000 became the first robotic surgical system cleared by the FDA for general laparoscopic surgery.

In the following years, the FDA cleared the *da Vinci* System for thoracoscopic (chest) surgery, cardiac procedures performed with adjunctive incisions, as well as urologic, gynecologic, pediatric, and transoral otolaryngology procedures.

Since 2000, an increasing number of leading medical institutions worldwide have bought and used the *da Vinci* Surgical System with an estimated 200,000 surgeries conducted in 2012.

Intuitive Surgical has continued to develop its technology. The *da Vinci Xi* Surgical System being the fourth generation of this technology.

Continued investment in R&D had made Intuitive Surgical one of the worlds most respected providers of robotic surgical devices worldwide.

around the world.

DA VINCI Xi

THE NEXT FRONTIER
FOR MINIMALLY
INVASIVE SURGERY

Da Vinci Xi Surgical System from Intuitive Surgical

Your Secret Weapon To Surgical Mastery

Minimally invasive surgery that's 100% under the control of your surgeon.

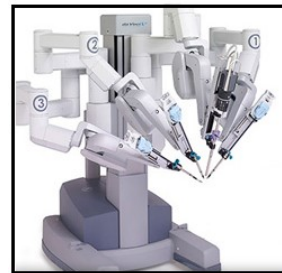

The *da Vinci Xi* Surgical System represents the latest in surgical and robotics technologies. It has broader capabilities than prior generations of the *da Vinci* System. It enables surgeons to operate

- through just a few small incisions
- with enhanced vision
- with precision
- with control

By translating your surgeon's hand movements into smaller, precise movements of tiny instruments inside your body.

Components of da Vinci Xi Surgical System:

- Surgeon Console
 - Natural hand-eye positioning
 - Comfortable seated posture
 - Built –in microphone facilities
- Patient –side Cart
 - Includes 3 or 4 robotic arms that carries out surgeons commands
 - Robotic arms move around fixed pivot points
 - Built-in safety checks prevents any independent movement of instruments or robotic arms

- Endowrist Instruments
 - 7 degrees of freedom
 - Range of motion far greater than the human hand
 - Minimizes surgeon hand tremors
- Vision System - 3D HD
 - Up to 10x magnification
 - Bright crisp, high-resolution image
 - Immersive view of the surgical field

Your Needs Are Our Focus

Our priority is to achieve optimal customer satisfaction through excellent product design, reliability and quality.

We emphasize responsiveness, integrity and personal responsibility.

Da Vinci Xi is used for:

- Cardiac Surgery
- Colorectal Surgery
- General Surgery
- Gynecologic Surgery
- Head and Neck Surgery
- Thoracic Surgery
- Urologic Surgery

Order today! It's risk free with our Da Vinci Complete Care Service Plan.
