

Is work-related stress bringing down your worker productivity, and losing you even more money through increased sick days?

Discover The One Simple Thing You Can Do Right Now... That Will Motivate Your Staff To Work Harder, Be Happier And Have Less Sick Days Off Per Year... And It Doesn't Have To Cost You A Penny!

Whether you want increased productivity, increased creativity or happier staff relations, this one benefit will have your staff working harder for you... and that's a promise!

Dear Business Owner,

Please let me introduce myself, my name is Neville Collymore, Owner of Sport Massage Inc. For the last 20 years I have been helping businesses decrease their sick days, increase productivity and have happier more creative staff increasing their business.

If you would like to find out how you can gain this kind of advantage over your competitors... then this will be the most important message you'll read today.

I Provide Client Centered Bespoke Deep Tissue Massage That Helps Your Staff Be More Relaxed, Sleep Better, Work Harder, And Have Much More Energy!

Here's how it works: You call me to arrange a private **FREE** consultation on your needs and the ideas you have. We will discuss your ideas and come to the best solution for us both.

If you are happy with the ideas, timeline and quotation, which can be paid by yourself or divided amongst your staff, then we can move forward together. If you are not astounded by my input, then we will say our good byes - no hard feelings.

I can't be fairer than that, can I?

And if you answer within 7 days of this letter, I will **free of charge** come in to your place of work and give a talk about work-related stress and how you and your workers can protect themselves against it.

So they have less pain, are less tired, they sleep better, have more energy for work and play and of course are healthier.

Some of the areas I'll cover are how stress can cause weight problems, elevated cholesterol levels, Obesity and eating disorders, high blood pressure, heart disease, increasing the likelihood of heart attacks, and diabetes.
